### **1.0 Installation and Licensing of Lumenaut**

Thank you for choosing Lumenaut, these instructions include details on installation and licensing of Lumenaut, please read them as they are important.

Before you proceed with the installation you need:

1. Windows 95, 98, NT, 2000 or XP installed on your machine
2. A copy of Excel 2000, 2002 (XP) or 2003 installed on your machine
3. A downloaded copy of the latest version of Lumenaut

For Windows NT, 2000 and XP, you require administrative privileges on your machine to install Lumenaut.

Please note, when installing Lumenaut, you **MUST** complete all steps below, including closing and opening Excel at then end, otherwise installation will not be complete.

#### I have never installed Lumenaut on my computer?

1. Close Excel if it is open
2. Click on the Lumenaut setup file
3. Follow the instructions given, it is best to install Lumenaut in the default directory suggested
4. Now close Excel and reopen to complete the installation process
5. Install complete
6. After one month the Lumenaut registration screen will appear
7. Press the "Purchase" button to be taken to the purchase web page for the version you have and follow the instructions to obtain your license details
8. Type in your license details to activate your copy of Lumenaut.

#### I am upgrading or re-installing Lumenaut?

In Windows, Close Excel and then Navigate to:

Windows > Start > Settings > Control Panel

Then click on "Add/Remove Programs" in the window that opens click n Lumenaut to remove the current installation.

You are now ready to install the updated version. Navigate to the subdirectory you created when you downloaded and extracted the updated version.

1. Close Excel if it is open
2. Click on the downloaded file
3. Follow the instructions given, it is best to install Lumenaut in the default directory suggested
4. Install complete

### Installation Notes

In some cases it may not be possible to start the setup program or the setup proceeds OK but the software cannot be registered. In both cases it is likely that your network administrator has limited the ability of general users to install software. In this case, please contact your network administrator to install the software for you.

If you are unable to register your copy of Lumenaut, first check that you have not made any typos. Second note that all "0" = zero and not the letter "O". Third check that you have downloaded the correct software version (Full, Academic or Student) for the license you have purchased.

## **2.0 Running Lumenaut**

There are two ways to start Lumenaut;

1. Windows > Start > Programs > Lumenaut, then click on "Start Lumenaut"
2. Just by opening Excel.

All Lumenaut routines are initiated in Excel > Tools > Lumenaut, then select the particular test required.

The help file is found in:

Tools > Lumenaut > Help > Help

And has details on data requirements, how to get started with an analysis and specific information on each statistical routine.

### **3.0 Uninstall**
